Presents

Flow Cytometry Core Principles

Sunday, March 23rd, 2014

Educational objectives: This one day course will cover the core principles of flow cytometry to provide critical concepts for all users. This course focuses on the core concepts of flow cytometry - the 'fundamentals' that every scientist using flow cytometry should know.

Target Audience: Users with flow cytometry experience looking to learn the primary concepts of flow cytometry. Learning the fundamentals will ensure that your flow cytometry experiments will yield proper results.
